Inputs
CUREv1
queries and passages
en, fr, es
Attributes
negation
dosage
frequency
subtype
stage
temporal
severity
Construction
1
Generator
Qwen2.5-7B proposes span, replacement, edited query
2
Substitution
unique match in passage gives the edited passage
3
Screening
Validator: Llama-3.1-8B
Two rule-based filters
Bidirectional evaluation
Pair set
346 screened pairs
82 training, 264 evaluation
Both query directions
Dense
Late interaction
Attribute features full or masked
Fixed rule or learned gate
Bidirectional metrics
A_o, A_c, balanced, pair consistency, exact intervals
Example (illustrative)
Passage edit: ... advised for stage II ... → ... advised for stage IV ...
Edited query: rewritten to fit the edited passage, new value not stated.
